6/24/20, 8/06/20,
10/28/20, 12/21/20

This update course will provide the student with:

- The information needed for recognizing the infant or child at risk of cardiopulmonary arrest.
- Information and strategies for preventing cognitive and psychomotor skills necessary for resuscitation and stabilizing the infant or child in respiratory failure, shock or cardiopulmonary arrest.

COST

\$190 per student
AMR Employees: See your CES Manager or Supervisor for Voucher information

Students need to have basic training in EKG Interpretation and Emergency Pharmacology prior to attending this course as it covers these topics in review form only. Students must be advanced life support providers. Students must show proof of their current PALS Provider card.

CE UNITS

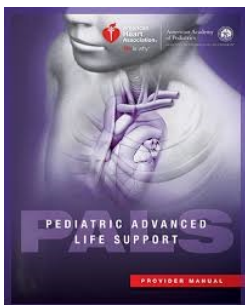

Up to 8 hours of instructor-based EMS CE will be offered by NCTI. CA EMS CE provided by California EMT-P CEP# 65-0106

*Students are also required to take the **pre-test** prior to the first day of class and bring completion confirmation to class. A link to access the pre-test will be included in your confirmation email.

Textbook is mandatory for course attendance:
