

# EVANSVILLE 911 NURSE NAVIGATION PROGRAM

*Right Care. Right Time. Right Place.*

When you call 911 during a medical event, you may not need an ambulance trip to your local hospital emergency department. The City of Evansville’s new program, developed in collaboration with the local EMS provider American Medical Response and program pioneer Global Medical Response, gives 911 call takers the option to connect you with a Nurse Navigator to figure out the right type of care for your situation, including how and where you get it.

RIGHT CARE	RIGHT TIME	RIGHT PLACE
Speak with a Nurse Navigator about your specific needs.	Using physician-approved protocols, a Nurse Navigator quickly navigates the caller to an appropriate care option.	Nurse Navigator refers you to local urgent care, virtual care with a provider or self-care at home.

Our innovative Nurse Navigation program ensures you quickly reach the most appropriate level of care based on your needs. Under the physician protocols, this may include transportation to local urgent care associated with your hospital choice, virtual care with a physician or other options (or in some cases a return to 911 ambulance dispatch).
