Warm up, cool down and take breaks. Walk and stretch before exerting yourself.

Dress appropriately. Lightweight, natural fibers provide warmth without trapping sweat.

Choose proper accessories. Wear safety glasses to keep eyes protected from flying dirt and debris, ear protection and gloves.

Use proper posture and movements. When picking items up, bend at the knees, not the waist.

Don’t overload yourself. To avoid injury, you should be able to handle bags and other heavy objects comfortably, without straining.

Climb ladders carefully. Make sure your ladder is in good repair with no loose hinges, rungs or screws. Place the ladder on a firm, level surface and check to make sure the ladder is fully open and locked.
